PROFILE

I'm a computer engineering student with a strong passion for motorsports. I have created and currently managing one of the most successful motorsport media brands in Türkiye with over 50,000 followers and coordinating a cross-functional team.

I have been working on web development since my High School years and I'm transforming visions into fully functional, high-quality websites with React.JS.

I also have been improving myself in C and Java stacks to solve complex engineering problems.

Currently seeking opportunities to apply my analytical thinking and coding skills to innovative software projects.

EDUCATION

Computer Engineering 09/2025 – Present
Trabzon University Trabzon, Türkiye
